

# From Ember.js 1.5 to 1.7

[@YoranBrondsema](#)

August 20th 2014

# About me

CTO of [Hstry](#)

Ember.js user for about 1 year

A bit about the release cycle

## 3 types of releases

- **Release** about every 6 weeks (now 1.7)
- **Beta** one version ahead of release, every week (now 1.8.0-beta.1)
- **Canary** last successful build of the day

# Major changes since 1.5

Ember.js internally uses ES6 modules

[ember-cli](#) is the new tool to use

project structure

asset pipeline

# Query params

[JSBin](#)

Lots of minor improvements and bug fixes

Thank you
